Certificate must contain a key pair, public and private key in the x509 format The PKI service does not detect the certificates that do not comply with the requirements (are hidden during enrollment).. NOTE:The cards Cosmo polIC 64K V5 2 and Cyberflex Access 64K V1 SM 2.1 support the certificate-based enrollment only (key pair mode is not supported).

To use PKI, specify a PKCS#11 module for your PKI device For more information, see PKI Settings.
